

REMARKS

At the outset, Applicants wish to thank Examiner Andrew Schechter for the courtesies extended to Applicants' representatives during the interview at the U.S. Patent & Trademark Office on July 15 and October 29, 2009. The claim language with respect the spatial extent of the recited "drain electrode" was discussed. Accordingly, the substance of the interview is incorporated into the foregoing amendments. Independent claims 1, 10, 12, 19, and 21 have been amended to recite "drain electrodes not overlapping the pixel region" and "a reflective layer on the second organic material layer having a transmissive hole at the open portion, the reflective layer disposed on the pixel region and not overlapping a region covered by the active layer, the gate electrode, the source electrode and the drain electrode."

CONCLUSION

In view of the foregoing, Applicant respectfully requests reconsideration and the timely allowance of the pending claims. Should the Examiner feel that there are any issues outstanding after consideration of the response, the Examiner is invited to contact the Applicant's undersigned representative to expedite prosecution.
